

Project Design Phase-II Data Flow Diagram & User Stories

Date	26 June 2026
Team ID	
Project Name	Metro Ticket Generating System in ServiceNow
Maximum Marks	4 Marks

Data Flow Diagrams: A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

User Stories

Use the below template to list all the user stories for the product.

User Story Backlog – Metro Ticket Generating System

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Mobile/Web User)	Registration & Login	USN-1	As a passenger, I can register and log in using my email and password.	User can successfully register and access the dashboard.	High	Sprint-1
	Search Metro Route	USN-2	As a passenger, I can select source and destination stations to search available routes.	Correct route and station details are displayed.	High	Sprint-1
	Fare Calculation	USN-3	As a passenger, I want the system to calculate the ticket fare automatically.	Fare is calculated accurately based on selected stations.	High	Sprint-1
	Book Metro Ticket	USN-4	As a passenger, I can book a metro ticket by selecting journey details.	Ticket request is created successfully.	High	Sprint-2
	Online Payment	USN-5	As a passenger, I can pay for my metro ticket using online payment methods.	Payment is processed successfully and transaction is recorded.	High	Sprint-2
	QR Ticket Generation	USN-6	As a passenger, I receive a QR-based digital metro ticket after successful payment.	QR ticket is generated and available in My Tickets.	High	Sprint-2
	Ticket History	USN-7	As a passenger, I can view my previous and current metro tickets.	Ticket history is displayed correctly.	Medium	Sprint-3
